Pursue a challenging role as a Software Development Engineer, emphasizing back-end development and expertise in microservices architecture.

PROFILE SUMMARY

Backend engineer building scalable microservices and high-throughput APIs, focused on reliability, performance optimization, fault tolerance, and low-latency system design principles.

CORE COMPETENCIES

- **Architecture:** Microservices Architecture, Distributed Systems, Low-level Design & High-level Design.
- **Development:** Back-end Development, API Development & Integration, Software Development Lifecycle.
- **Optimization:** Performance Optimization & Monitoring, Data Structures & Algorithms.

TECHNICAL SKILLS

- **Languages:** Java 17, C++, Python, Node.js, Golang
- **Framework:** Springboot
- **Database:** SQL (MySQL, PostgreSQL) & NoSQL (Redis, Aerospike, ElasticSearch)
- **Messaging:** Kafka, SQS
- **Monitoring & Logging:** Prometheus, Grafana, ELK
- **Cloud & DevOps:** AWS, Kubernetes, Docker, CI/CD
- **Tools:** Cursor, Claude Code, IntelliJ IDEA, Git

WORK EXPERIENCE

73 Strings | SDE II

Nov 2025 – Present

- Engineered an **AI-agent** to build a **Java-migration agent** for Java repositories, significantly **automating** the modernization of legacy codebases.
- Added new features to the **approval workflow**, including **role-based validations** and additional approval stages.
- Optimized **approval APIs** by **reducing latency** and handling **concurrent approvals** safely.

Sumo Logic | SDE II

Jun 2024 – Oct 2025

- Worked on a **high-scale metrics ingestion** and query platform supporting **70M+ datapoints per minute**, ensuring **low latency** and **high availability**.
- Optimized the design of the **in-memory data store** within the platform to **reduce query latency** during ingestion lag, improving responsiveness.
- Improved **distributed data processing** efficiency by refining **Kafka consumer group rebalancing** across pods, enabling **balanced partitioning** and **higher throughput**.
- Streamlined platform performance by resolving legacy bugs and **bottlenecks**, enhancing speed, reliability, and **resource utilization**.

Open Financial Technologies | SDE | Bengaluru

Sep 2022 – May 2024

- Orchestrated seamless **integration of core banking services** (IDFC, Indusind, Axis) by developing robust **microservices**, enabling a smoother financial platform experience for end-users.
- Pioneered the design and roll-out of a microservice for **Axis Current Account onboarding**, reducing onboarding time and enhancing the customer acquisition pipeline.
- Spearheaded initiatives to **automate key financial operations**, resulting in a **15% reduction** in customer service inquiries related to fund transfers and account management.
- Championed efforts to ensure **scalability & security** of microservices, maintaining high levels of system performance during **peak financial transactions**.

Exotel | SDE | Bengaluru

Sep 2021 – Sep 2022

- Designed and implemented a microservice that improved **pickup rate by 1.5%** using **ASR** for **intelligent pilot number selection**, contributing to increased user engagement.
- Validated new approach through a successful **Proof of Concept (POC)**, ensuring alignment with business requirements before full-scale launch.
- **Automated data integration** from third-party APIs, improving operational workflow by reducing manual errors and enhancing database management efficiency.

EDUCATION

JSS Academy of Technical Education, Noida
B.Tech. in Computer Science Engineering

2021
